

New Mexico's Own World-Class Cancer Center,
The University of New Mexico Cancer Center,
is Breaking Ground on a World-Class Home.

EXPANDING THE BOUNDARIES OF HOPE - RIGHT HERE.

Today, the University of New Mexico Cancer Center, the State of New Mexico's Official Cancer Center and One of the Nation's Pre-eminent National Cancer Institute-Designated Centers, is breaking ground on a new 190,500 square foot state-of-the-art cancer facility. This new treatment center will provide all New Mexicans access to the most comprehensive, world-class cancer care available for imaging, diagnosis, and therapy, including radiotherapy, radiosurgery, and robotic surgery under one roof. Such a new facility is essential given that we treat more than 40% of adults and virtually all children diagnosed with cancer every year in New Mexico. These patients come to us from every corner of the state and all walks of life. The focus of this new facility will be on the comfort and well being of our patients and their families, as well as fostering an environment of comfort, safety and hope. There is a real choice in the fight against cancer - and it's right here - in New Mexico. Visit our website at cancer.unm.edu to learn more.
