Dentist Anesthesiologist Clinical Privileges

Name: __________________________ Application Date: ________________

Initial privileges (initial appointment) | Requested
Renewal of privileges (reappointment) | Requested
Expansion of privileges (modification) | Requested

Dental Location(s): ☐ Dental Clinics ☐ ASC

Instructions

Applicant: Check off the “Requested” box for each privilege requested. Applicants have the burden of producing information deemed adequate by the UNMMG Board for a proper evaluation of current competence, current clinical activity, and other qualifications and for resolving any doubts related to qualifications for requested privileges.

Department Chair & Clinic Medical Director: Check the appropriate box for recommendation on the last page of this form. If recommended with conditions or not recommended, provide condition or explanation on the last page of this form.

Other Requirements

1. Note that privileges granted may only be exercised at UNMMG clinics that have the appropriate equipment, license, staff and other support required to provide the services defined in this document. Site-specific services may be defined in clinic or department policy.
2. This document defines qualification to exercise clinical privileges. The applicant must also adhere to any additional organizational, regulatory, or accreditation requirements that the organization is obligated to meet.

UNM Medical Group, Inc., is a part of an association of healthcare providers established by the UNM Health Sciences Center Board of Directors under and pursuant to the provisions of the Review Organization Immunity Act, Section 41-9-1 et seq., NMSA 1978 (“ROIA”). The information and materials identified in this document were prepared for the purposes of peer review as described and defined in ROIA and are, therefore, confidential and not to be disclosed except as provided in ROIA.

Policies Governing Scope of Practice

**Medical Record Charting Responsibilities**
Clearly, legibly, completely, and in timely fashion describe each service the provider provides to a patient in the clinic and relevant observations. Standard rules regarding authentication of, necessary content of, and required time frames for preparing and completing the medical record and portions thereof are applicable to all entries made.

**Periodic Competence Assessment**
Applicants must also be able to demonstrate they have maintained competence based on unbiased, objective results of care according to the Practice Oversight Committee’s existing quality assurance mechanisms and by showing evidence that they have met the continued competence requirements established by the state licensing authority, applicable to the functions for which they are seeking to provide at this clinic. In addition, continuing education related to the specialty area of practice is recommended/required as mandated by licensure.
Qualifications for Dental Anesthesiology

Initial privileges: To be eligible to apply for privileges in dental anesthesiology, including deep sedation/general anesthesia, the applicant must meet the following criteria:

DDS or DMD

AND

Successful completion of an accredited residency in dental anesthesiology that includes a training program of two years or more in general anesthesia.

AND

Age-appropriate ALS (ACLS and PALS) certification

AND

A deep sedation/general anesthesia certification permit by the New Mexico State Board of Dental Healthcare. The New Mexico State Board required elements for general anesthesia permit.

- Completion of an advanced training program in anesthesia per ADA guidelines for teaching and comprehensive control of anxiety and pain in dentistry.

- Completion of a post-doctoral training program, which affords comprehensive and appropriate training in adult and pediatric cases necessary to administer and manage general anesthesia.

AND

Board Certification/Recertification: Must be admissible or certified by a National certifying board and must maintain board certification:

- With the National Board of Anesthesiology or National Dental Board of Anesthesiology or American Dental Board of Anesthesiology.

Continued…
Required Current Experience: Demonstrated current competence and evidence of the performance of an adequate volume of procedures with acceptable results, in the past 12 months or completion of training in the past 12 months.

Renewal of privileges: Demonstrated current competence and evidence of the performance of an adequate volume of procedures with acceptable results in the past 24 months based on results of ongoing professional practice evaluation and outcomes.

CORE PRIVILEGES: Dental Anesthesiology Core Privileges

Evaluate, treat, and provide consultation and anesthesia services to patients of all ages that require anesthesia for dental treatment. Perform pre-operative anesthesia evaluation, intra-operative anesthetic management, and post-operative anesthetic management. The core privileges in this specialty include the procedures on the attached procedure list and such other procedures that are extensions of the same techniques and skills.

☐ Requested

Dental Anesthesiology Core Procedures

UNM Medical Group, Inc., is a part of an association of healthcare providers established by the UNM Health Sciences Center Board of Directors under and pursuant to the provisions of the Review Organization Immunity Act, Section 41-9-1 et seq., NMSA 1978 (“ROIA”). The information and materials identified in this document were prepared for the purposes of peer review as described and defined in ROIA and are, therefore, confidential and not to be disclosed except as provided in ROIA.

Page 4 of 7 Initials_____
This list is a sampling of procedures included in the core. This is not intended to be an all-encompassing list, but rather is reflective of the categories/types of procedures included in the core.

To the applicant: If you wish to exclude any procedures, please strike through those procedures that you do not wish to request, then initial and date.

1. Perform history and physical exam for the practice of dentistry
2. Regional anesthesia with intraoral local anesthetic injections
3. Inhalation sedation or analgesia with nitrous oxide and oxygen
4. Oral sedation and analgesia
5. Minimal (CS I) sedation defined as:
   A drug-induced depression of consciousness during which patients respond purposefully to verbal commands, either alone or accompanied by light tactile stimulation. No interventions are required to maintain a patent airway, and spontaneous ventilation is adequate. Cardiovascular function is usually maintained. Practitioners must be competent to rescue patients from a more profound level of sedation, which may involve airway support. Privileged providers may administer or supervise qualified allied health professionals in the administration of moderate sedation. Moderate sedation may only be administered in accordance with relevant UNMMG Dental policies and procedures.
6. Moderate (CSII) Sedation defined as:
   A drug-induced depression of consciousness during which patients respond purposefully to verbal commands, either alone or accompanied by light tactile stimulation. No interventions are required to maintain a patent airway, and spontaneous ventilation is adequate. Cardiovascular function is usually maintained. Practitioners must be competent to rescue patients from a more profound level of sedation, which may involve airway support. Privileged providers may administer or supervise qualified allied health professionals in the administration of moderate sedation. Moderate sedation may only be administered in accordance with relevant UNMMG Dental policies and procedures.

*Continued*
7. Deep Sedation/General Anesthesia defined as:
   A drug-induced depression of consciousness during which patients cannot be easily aroused but
   will respond purposefully following repeated or painful stimulation. The ability to independently
   maintain ventilatory function may be impaired. Patients may require assistance in maintaining a
   patent airway and spontaneous ventilation may be inadequate. Cardiovascular function is usually
   maintained but may be impaired. If the patient loses consciousness and the ability to respond
   purposefully, the anesthesia care is a general anesthetic, irrespective of whether airway
   instrumentation is required. Unrestricted general anesthesia shall only be administered by dental
   anesthesia professionals within their scope of practice.
   The qualified dental provider managing the anesthesia care of the patient receiving deep
   sedation/general anesthesia must have no other responsibilities that would require leaving the
   patient unattended or compromising continuous patient monitoring for the duration of the
   anesthetic episode. Privileged providers may administer or supervise qualified allied health
   professionals in the administration of Deep Sedation or General Anesthesia.

Acknowledgment of Practitioner

UNM Medical Group, Inc., is a part of an association of healthcare providers established by the UNM Health
Sciences Center Board of Directors under and pursuant to the provisions of the Review Organization Immunity
Act, Section 41-9-1 et seq., NMSA 1978 (“ROIA”). The information and materials identified in this document were
prepared for the purposes of peer review as described and defined in ROIA and are, therefore, confidential and
not to be disclosed except as provided in ROIA.
I have requested only those privileges for which by education, training, current experience, and demonstrated performance I am qualified to perform and for which I wish to exercise at UNMMG Clinics, and I understand that:

a. In exercising any clinical privileges granted, I am constrained by UNMMG Clinic and medical staff policies and rules applicable to generally and any applicable to the particular situation.

b. Any restriction on the clinical privileges granted to me is waived in an emergency situation, and in such situation my actions are governed by the applicable section of the medical staff bylaws or related documents.
