Nuclear Pharmacy Services

The Nuclear Pharmacy Services business of Cardinal Health compounds and dispenses radiopharmaceuticals for diagnostic and therapeutic use by nuclear medicine departments in hospitals and outpatient clinics. Cardinal Health fills and distributes 65 percent of all radiopharmaceutical unit doses dispensed in the United States through an integrated network of more than 150 nuclear pharmacies.

Nuclear Pharmacy Manager

As a Nuclear Pharmacy Services Nuclear Pharmacy Manager, you will oversee and be accountable for the operations and financial results of the assigned pharmacy(s), ensuring appropriate customer service is provided and optimal use of resources is attained. Additional duties include: overseeing the Radiation Safety Program, participating in the sales process and directing all operational activities as well as all human resources and finances associated with the pharmacy(s) for which direct responsibility is held.

Nuclear Pharmacist

As a Nuclear Pharmacy Services Nuclear Pharmacist, you will provide high-tech pharmacy services by preparing, dispensing and distributing quality radiopharmaceuticals to medical care providers on a timely basis. Additional duties include: performing quality control tests, packaging doses for shipping to customers and providing follow up service to clients or health care providers on an as-needed basis.
