

**NuQuest Nuclear Pharmacy
1048 Independent Ave, #108
Grand Junction, CO 81505**

Nuclear Pharmacist Opening

NuQuest, Inc. is an independently owned and operated Nuclear Pharmacy located in Grand Junction, Colorado. Grand Junction is in the heart of Western Colorado, which is the gateway to the Rocky Mountains. Numerous outdoor activities abound such as mountain biking, hiking, camping and fishing. World-class snow skiing is less than 2 hours away.

Job Summary and Responsibilities:

Compound and dispense Radiopharmaceuticals by performing the following essential duties and responsibilities;

1. Timely and accurate procurement of radiopharmaceuticals and other drugs, supplies and materials.
2. Compounding of radiopharmaceuticals.
3. Quality assurance of radiopharmaceuticals and of instruments, equipment and devices.
4. Dispense radiopharmaceuticals properly and accurately.
5. Distribute radiopharmaceuticals properly and accurately.
6. Radiation safety – handling spills, contamination, ALARA, etc.
7. Maintain open communication and supervise laboratory personnel in the performance of their duties
8. Pinestar software system for data entry/update, end of day reports and daily dose management reports
9. Assures that packaging and shipping of radioactive material are in compliance with all state and federal regulations.
10. All other duties as assigned

Qualifications

Eligible to be licensed as a Nuclear Pharmacist in the State of Colorado. Able to become an Authorized User in the State of Colorado. Demonstrated human relation and effective communication skills also required.

An "Authorized Nuclear Pharmacist" is an individual who through appropriate training and experience is qualified and authorized to work independently with radiation sources and to supervise such use by others.

For non-nuclear pharmacists, we provide an extensive training program that includes both the didactic and supervised practice hours you need to become certified as an Authorized Nuclear Pharmacist.

Work Schedule

230 AM - 330 PM with a **2 week on 2 week off rotating schedule** with our other Nuclear Pharmacist on staff.
