

NMIC Priorities for 2004

- Support the implementation of the Statewide Immunization Information System (SIIS) and other data gathering and quality improvement activities.
- Foster and support local immunization coalitions and other immunization related activities through mini-grants and technical assistance.
- Increase the public's knowledge and awareness of the critical importance of immunizations through public information, educational campaigns, and special events.
- Support and promote the improvement in knowledge and practice of health care providers about immunization recommendations, practices, programs, and benefits.
- Advocate and build consensus for sound and dependable immunization policies, practices and financing.

Governor and First Lady Barbara Richardson, Lt. Governor Diane Denish, and DOH Secretary Pat Montoya celebrate National Immunization Awareness Month with a press conference featuring the NMIC!
