OBJECTIVES

This course is designed to provide practicing general surgeons, residents, nurses and physician assistants who treat and manage surgical patients with an update on current challenges encountered in daily practice. Ample opportunity for discussion with local and visiting faculty will be provided. At the conclusion of the program, the participants will be able to:

- Identify new techniques and treatment options in vascular and cardiac surgery.
- Identify minimally invasive techniques and upcoming trends in surgical oncology treatments.
- Identify common pediatric surgical diseases and their treatments.
- Recognize child abuse.
- Manage various surgical problems in pregnant patients.
- Evaluate surgical patients for familiar cancer risks.
- Manage gynecological oncology problems encountered during laparotomy.
- Improve patient safety in the OR.
- Identify the biology, epidemiology and clinical symptoms associated with the new Methicillin Resistant Staphylococcus Aureus (MRSA).
