

PROTOCOL #33 Maternal Fetal Medicine, University of New Mexico

REFERRAL FOR SUSPECTED CONGENITAL ANOMALIES

To refer a patient for consultation due to suspected congenital malformation, these steps should be followed:

- A. Once a diagnosis is made, the patient should be referred to the Prenatal Diagnosis and Genetics service. Call 505-272-6611 for an appointment.
- B. Please fax copies of the patient's medical record, including labs, prenatal flowsheet, and all ultrasound reports, to 505-272-1311.
- C. The clinic staff will coordinate the appropriate diagnostic procedures, counseling, specialty consultations, and perinatal management.

CONSULTATION: 24 hour consultation is available by calling the Maternal Fetal Medicine service at the University of New Mexico Hospital 1-888-UNM-PALS.
