

# ABOUT NEW MEXICO

New Mexico is one of the largest states geographically, but the population is under 2 million.

Located in the Rio Grande Valley, at 5,314 feet Albuquerque is bordered by the Sandia Mountains Wilderness: 37,000 acres of land, 117 miles of hiking and biking trails, and a small community of black bears.

Founded in 1706, Albuquerque has been named one of the best places to live by Newsweek, U.S. News & World Report, Money and Entrepreneur Magazines.

New Mexicans enjoy national theater productions, concerts, world-class opera and Native American and Hispanic Cultural Events.

New Mexico contains 13 National Monuments and Parks, 29 State Parks and five National Forests.

Albuquerque and nearby communities are high-tech meccas, home to three national laboratories as well as many major technology companies.

And last but not least: Contrary to what some people think, we are one of the 50 states. No passport is needed!

## WELCOME TO THE UNIVERSITY OF NEW MEXICO GERIATRIC PSYCHIATRY FELLOWSHIP

Our diverse faculty has designed this Fellowship to prepare general psychiatrists both to manage medically fragile elderly patients as well as to expand expertise in consultation-liaison psychiatry, neuropsychiatry, and eating disorders.

Fellows receive solid core training alongside opportunities to focus on palliative care, sleep medicine, traumatic brain injury, neuroimaging, research, or other individual goals.

New Mexico's over-65 population will soon exceed the national average. It's ethnic diversity, which includes 19 Native American pueblos, each with a rich tribal history and culture, provides unique opportunities in Native American and rural subspecialty healthcare. The Fellowship is well integrated into the University of New Mexico's many resources.

Please contact us to discuss how we can help you achieve your career goals.
