

**ONE POSTDOCTORAL POSITION
AT THE UNIVERSITY OF NEW MEXICO
SCHOOL OF MEDICINE
Department of Biochemistry and Molecular Biology**

One postdoctoral position is immediately available to study vacuolar ATPase proton pumps in *Saccharomyces cerevisiae*. Applicants would have a PhD in biochemistry, molecular biology, cell biology, genetics, or a related field. Preference will be given to candidates with demonstrated experience in yeast genetics. The ideal candidate will be highly motivated with demonstrated ability to carry out independent research and a record of peer-reviewed publications. The candidate will be expected to participate in and contribute to a highly interactive research environment involving students.

Applications should include a cover letter, CV, and the contact information for three references. Interested applicants should email materials to:
