Re: **HSC Fringe Benefit Rates on Proposals – FY 2023**

The fringe benefit rates and methodologies provided in this memo are to be used on new contract and grant proposal budgets with a begin date on or after of July 1, 2022. These rates replace the prior year rates. Principal investigators may use either prior year actuals (Method 1) or estimated rates (Method 2). To comply with OMB Uniform Guidance (2014), Cost Accounting Standards, whichever method is used, it must be used consistently throughout the entire proposal. Since we are responsible for the actual costs incurred, the budgeted amounts should reflect as close as possible what actual expenses would be. In the event that the budgeted amount does not cover the actual costs incurred, it will be necessary to re-budget during the period of the contract/grant to pay for actual fringe benefit costs.

Method 1(Actuals):

Estimate cost per person based on past experience (actuals). UNM MyReports Report FNRSLE – Salary Labor Benefits and Encumbrance Report showing fringe benefit rates as a percent of salary must be included as supplementary documentation when the proposal is sent to HSC PreAward. A schedule of all personnel on the grant and their respective fringe rates is to be included in each proposal. Fringe benefits are to be increased by 1.6% per year.

FY 23 Example:

If the FY 22 actual full-time faculty fringe rate was 29%, the FY 23 actual full-time faculty fringe rate would be projected at 29.46%, calculated as follows:

$.29 * 1.016 = .29464$ or 29.46%.
