# Windows 11 Roll Out Calendar

## Here's what you can expect on upgrade day:

- Windows 11 will download in the background.
- This update will require your computer to restart. The update pop-up window will allow you to schedule the most convenient time to restart your computer.
- Plan for 30–60 minutes of downtime.
- Your computer may restart several times during the upgrade.
- Note: If the Windows 11 update fails, please contact the Service Desk by calling (505)272-1694 or log a ticket online here.

## Tips for a Smooth Upgrade

- Save your work and back up important files before the scheduled date.
- You may self-install ahead of your scheduled date if you prefer—see the Windows 11 tip sheet for steps.

**Note:** UNM Health (Lomas, SRMC, and Medical Group) will follow a separate update process. **Not sure which group you're in?** If your device has a **UNMH Property Tag** with an **"ACN"** number, you **are not** included in this rollout cycle.

If you have questions about this upgrade, please reach out the Windows 11 Transition Team or your department specific IT personnel.

HEALTH SCIENCES

## August 25
