

Explorabilities

Steven Fischer

CDD LEND Self-Advocate

The Mission of Explorabilities

The Mission of Explorabilities is to provide the best in Physical, occupational and, speech therapy that will support healthy development for the children and their families and they have been providing services for 35 years

What is the Cost of Services

Explorabilities accepts Medicaid and Medicare plans as well as most private insurances usually only having a co-pay between \$5 to \$40. Cost is also negotiable for patients who are paying out of pocket.

Quality of Service

There's serious quality in the services that Explorabilities provides. Its not difficult to set up an appointment, a client just needs to contact the scheduler who will ask what services and, who their primary doctor is. When they arrive they will greeted by the receptionist who will have them sign in. Clients can expect to meet with someone shortly after their arrival as the service providers do their best to keep up their scheduled times. Also they closely follow state and federal mandated policy and provide equal services regardless of the amount paid, and priority is given from youngest to oldest but exceptions will be made for those who are needing more urgent care and, they are willing to bring in an interpreter to be more accessible to clients from different cultures.

Services are Provided

Explorabilities provides physical therapy, occupational therapy, and speech language services and, recently have also started orthopedic treatments as well. They work together with other organization such as; New Mexico Preschool for the visually impaired, New Mexico preschool for the deaf, Carrie Tingley hospital for wheelchair fittings, Hanger for helmets for plagiocephaly, and different agencies for psychologist and counselors. They often receive referrals for foster children, and from the agencies mentioned before. They search for new evidence based therapies, review research articles, look at where their referrals are coming from, look at new insurances to broaden their reach to other clients in need of services, and have weekly staff meetings to review their clients and what services they're being provided.

CARRIE TINGLEY HOSPITAL

The Facilities

The facility is well kept. It doesn't have the typical sterile feel that most clinics have. They have wide range of equipment to use for therapy sessions not including the materials that each therapist brings them selves. Most of the building is dedicated for use with children however there is a section set aside for adult therapy as well. The building is well kept and items they receive a lot of contact are washed regularly

Accessibility

- Plenty of parking
- Automatic sliding doors at the front
- All patient areas are wheelchair accessible
- Highly accommodating
- Posted materials are in English and Spanish
- Can be accessed from the front or back

How's Explorabilities Funded

Funding is stable. It comes from the services they provide whether its paid for by insurance or, if a payment plan built around the patients financial circumstances. They are contracted through most insurances including Medicaid and Medicare.
