

# IHS COVID-19 TELEECHO

1<sup>st</sup> and 3<sup>rd</sup> Thursdays of each month

2pm ET / 1pm CT / 12pm MT / 11pm PT / 10am AK

The IHS COVID-19 TeleECHO sessions convene IHS, tribal and urban area providers from around the U.S. in crucial real-time, peer-to-peer clinical learning to discuss urgent focus areas and new developments in COVID-19 screening, treatment, and management of post-infection syndromes.

Interactive, case-based learning with an emphasis on working through real patient and system level challenges

Focused on skills and knowledge for community-level COVID-19 response

Builds a network of public health peers working in AI/AN communities around the country

## Curriculum Topics:

- Emerging Therapies for COVID-19
- Treatment and Clinical Updates
- Individual and Community Based Mental Health Impacts
- Vaccine Considerations
- Critical Care of the COVID-19 Patient
- Adapting Ambulatory Care
