Project ECHO Helps First Responders Connect To Experts & Colleagues

University Showcase, KUNM Radio

Dr. Joanna Katzman and Paramedic, Lt. Bryan Breeswine, discuss Project ECHO's First Responder Program and how it addresses a number of issues that First Responders face daily in their professional lives. Using the "all teach, all learn" model, the telementoring program connects First Responders with subject experts and peers from around New Mexico at no cost to participants.

UNM offers remote mental care, education for first responders

Taos News

Supported by funding from the U.S. Department of Agriculture and New Mexico Department of Health, the University of New Mexico announced this fall that first responders throughout the state are invited to participate in free weekly webinars designed to help them better deal with the challenges of their jobs and hone their skills in serving the public.

New Program Helps New Mexico First Responders Struggling with PTSD

JEMS Journal of Emergency Medical Services

A new online mental health program is now available to first responders in a state where medical help could be hours away. The University of New Mexico launched the First Responder ECHO program last month in response to increased rates of post-traumatic stress disorder, compassion fatigue, depression and suicide among EMS service providers, firefighters and police.

First Responder TeleECHO

University of New Mexico Health Sciences Newsroom

UNMHSC's Project ECHO launches program to address mental health needs of New Mexico's frontline providers. The new program, supported with funding from the New Mexico Department of Health and the U.S. Department of Agriculture, aims to stem rising rates of post-traumatic stress disorder, compassion fatigue, depression and suicide among paramedics, firefighters and law enforcement.
