

UNM-AETC HIV TeleECHO Clinic

Email HIVecho@salud.unm.edu
for more information

Project ECHO® & the University of New Mexico HIV Education and Training Center (UNM-AETC) welcome you to participate in our weekly HIV TeleECHO clinic. The curriculum will build on itself and is designed to help providers not familiar with HIV to become familiar and then proficient in the treatment and prevention of HIV in a primary care setting. We encourage members of the healthcare team to present cases for group discussion.

Goals for Participation Include:

- Increase knowledge and skills to provide up-to-date, evidence-based HIV prevention & treatment in your healthcare setting
- Create an HIV community of practice where best practices relevant to our region are shared

How to Participate:

- Email HIVecho@salud.unm.edu to join our email list.
- Join us on video via Zoom or telephone every Tuesday from 12-1pm MT
- Participate in brief didactic presentations and interprofessional case discussions
- Complete online registration and evaluation forms to receive CME/CPE/CEU/CNE credits

- All participants are asked to complete an on-line **AETC PIF** (Participant Information Form) once a year and an on-line evaluation for each session attended.
- For confidentiality, HIPAA compliance, and professionalism, each participant is asked to identify him/herself during each teleECHO session so that we can verify that you are a qualified healthcare professional. TeleECHO sessions are not open to the general public or to patients.

The UNM-AETC is affiliated with the South Central AETC which is supported by a cooperative agreement from the Health Resources and Services Administration (HRSA) and is part of the Ryan White HIV/AIDS program.
