WORKSHOP INFORMATION

A CME-Accredited Workshop for Healthcare Educators

Target Audience: Simulation instructors, clinical educators, and healthcare professionals involved in student or resident education.

Transform your teaching practice with evidence-based feedback strategies that foster growth, resilience, and meaningful learning. This intensive one-day workshop combines theoretical frameworks with practical applications, helping educators deliver feedback that resonates and drives improvement.

Why This Workshop Matters: Effective feedback is the cornerstone of medical education, yet it remains one of the most challenging skills to master. Learn how to turn difficult conversations into opportunities for growth and create a psychologically safe learning environment that promotes excellence.

CME Credits

5.75 AMA PRA Category 1 Credits™

For UNM Faculty: Category 2 and Category 3 AMEP Credit

SCHOOL OF
MEDICINE

ANESTHESIOLOGY &
CRITICAL CARE MEDICINE

Key Learning Highlights:

- Master the "good judgment" approach to feedback that balances honesty with empathy
- Develop strategies to overcome common feedback barriers in educational settings
- Understand the psychological impact of feedback and how to deliver constructive criticism that motivates rather than discourages
- Learn practical techniques for managing emotional responses during feedback sessions
- Explore the crucial difference between shame and guilt in learning environments

What You'll Take Away:

- Evidence-based frameworks for structured feedback
- Practical tools for difficult feedback conversations
- Strategies for creating psychological safety
- Techniques for promoting reflection and self-assessment
- Methods for addressing resistance and defensive reactions
