presented by the Department of Pediatrics,
Neonatology Outreach Program in
partnership with the Office for Continuous
Professional Learning at The University of
New Mexico School of Medicine

CONFERENCE DESCRIPTION

The 31st Annual Amazing Newborns Conference, titled **Averting Crisis in the Newborn**, is aimed at providing health care professionals tools and skills to assess the newborn who is in crisis at birth. Included in this year's conference are 2-30 minute "Treat Now!" talks, aimed at giving providers information on how to identify and treat conditions that require immediate care to prevent long-term complications. The breakout session will focus on skills needed for assessment and stabilization.

CONFERENCE OBJECTIVES

At the conclusion of this conference, the participant should be able to:

1. Identify neonates at greater risk for poor neurodevelopmental outcomes based on maternal opioid use.
2. Apply current modalities for the treatment of PPHN to improve recovery and decrease the negative long-term effects of hypoxia in the neonate.
3. Assess the resources, knowledge and skills they currently have when treating at-risk populations to identify areas in need to support and improve.
