

## TRAINEESHIP OPPORTUNITY

The College of Population Health invites junior faculty, researchers and advanced doctoral students to collaborate with a team in public health and evaluation research and practice. Opportunities are with the COPH Assessment, Planning & Evaluation Unit, aimed at providing technical assistance and evaluation to state agencies and community organizations; and research grants in occupational health & safety and sustainable agriculture

**This opportunity provides hands-on training to strengthen research, practice and scholarship capacities**

### Benefits

Training/development in areas such as:

- population and public health research
- community engagement
- community health practice
- program planning
- evaluation
- needs assessment
- survey development
- data collection, management and analysis
- reporting and dissemination
- scientific manuscript and abstract development
- presentation/communication skills

Collaboration/Networking:

- integration into a team of senior researchers and graduate and undergraduate students
- interaction with professional and community groups (e.g. coalitions, state/county agencies, community organizations, professional groups)

Mentorship:

- mentoring by experienced senior researchers and scholars
- opportunity to mentor undergraduate and master level students

Compensation:

- Stipend

### Eligibility

- PhD, DrPH or equivalent with less than 2 years from graduation
- junior faculty
- junior scientists
- doctoral students on their last year(s) of dissertation study

### Requirements

- commitment to contribute to the assigned grant or contract
- statement of purpose, interest in working with the COPH
- copy of updated CV/resume
