## SKIIP Vaccine Inventory and Temperature Log

The public health nurse will print this checklist and affix to the transport cooler for your SKIIP clinic. Use it to record how many vaccines were provided by your public health office, how many doses were returned after the clinic, and to record the hourly vaccine temperature.

School nurse name & phone:	Pick up date:						
Public health nurse name & phone:		VFC PI	IN #	Public health office location:			
Doses picked up: (A) Total doses picked up	Injectable		Flucelvax:	Contraindicated for persons with allergy to egg Use only in ages 4-18 years old			
Doses returned: (B) Total doses returned	Injectable			Temperature >46° F (too warm)			
Doses wasted:         (C) Total doses wasted         Lot number and reason:         Doses administered:         (D) Total doses administered (A-B-C=)         Consent forms returned:         (should match doses administered)	Injectable Injectable Injectable		<ul> <li>If unit runs turned on</li> <li>If unit is ha are include</li> <li>Assure tha not in direct</li> </ul>	t transport unit lid is tightly closed on electricity, assure that the unit is plugged in and is frozen/refrigerated sleeves, makes sure all the sleeves ed. Return to the PHO immediately if a sleeve is missing! <b>Temperature &lt;36° F (too cold)</b> t thermometer probe is in the center of the vaccine and ct contact with frozen sleeves or electrical cooling vents. refrigerated sleeve is innermost in the transport unit			
<ul> <li>(E)Total consents returned</li> <li>mismatch (missing forms): (D-E=)</li> <li>The items below must be returned to the public health as possible on the clinic day but no later than 4pm:</li> <li>Consent forms (separated into Medicaid/non-Medicaid</li> <li>Transport unit with all unused vaccine, ancillary suppli</li> <li>Temperature log</li> <li>If doses were wasted, make sure to document lot num the doses wasted section</li> </ul>	l) es, emergency kit		<ul> <li>Leave the lid slightly ajar until temperature has returned to 36-46° F</li> <li>If temperature is still out of range after 30 minutes</li> <li>Do not discard the vaccine</li> <li>Label vaccines "Do Not Use" stored in the unit</li> <li>Keep vaccines stored in the unit</li> <li>Immediately notify the public health nurse for further instruction</li> <li>If unable to reach public health nurse, temporarily suspend your clinic until you can reach a public health nurse.</li> </ul>				

Temperature log instructions: Temperature must be monitored throughout the day and documented at least hourly. Record the time, initial, and place an "X" in the box that corresponds with the temperature.
