

Etiology and Systemic Effects of HIV and Impact on Oral Health

SCHOOL OF MEDICINE
DEPARTMENT OF DENTAL MEDICINE

All patients deserve comprehensive dental care delivered with compassion. This includes patients living with HIV/AIDS yet the oral health needs of this population remain unmet. This course will discuss barriers to care and offer solutions to help dental providers address this need. It will review the etiology and systemic effects of HIV and its impact on oral health. Oral manifestations of this population will be identified and an update of the latest treatment strategies will be discussed.

FRIDAY, June 21, 2019

10:00am - 12:00pm

UNM Novitski Hall

2 CEU's . \$25.00 . https://secure.touchnet.com/C21597_ustores/web/store_cat.jsp?STOREID=247&CATID=334&SINGLESTORE=true
