- Public Health

Program Overview

Offered in continuation to the Bachelor of Science Degree in Dental Hygiene, the Master of Science Degree Program in Dental Hygiene will enable the graduate level prepared dental hygienist to:

- Build on the knowledge gained in Baccalaureate dental hygiene program.
- Prepare and specialize in dental hygiene.
- Enhance decision-making skills by participating in graduate level dental hygiene courses.
- Develop problem-solving skills for independent dental hygiene practice.
- Contribute to the dental hygiene scientific body of knowledge.
- Conduct research and theory development in the dental hygiene sciences.
- Expand the scope of general knowledge by participating in University elective courses.
- Provide career opportunities in alternative practice settings.
- Build a foundation for future doctoral education in related disciplines.
- Develop collegiate relationships with practicing healthcare professionals.
- Participate in graduate dental hygiene internship experiences in educational settings, rural areas, industry and community outreach sites.

Satisfactory completion of the Master's Exam or thesis defense is mandatory for graduation. For course synopses, graduation requirements and additional information, please refer to the department's website:

Semester 4	
DEHY 504 Internship	6
DEHY 507 or Graduate Course from Specialty	3
Total	37

Graduate curriculum

The Master of Science in Dental Hygiene degree program follows a four semester graduate level curriculum, which begins each year during the fall, spring, and summer semesters. Students do have the option to enroll on a full or part time basis. In addition to tuition, only books and other usual school expenses should be expected.

Online classes offer:

- Flexibility for daily planning
- Student's choice of best time and place to learn
- Frequent interaction with instructors and other students through online chats, email, and other learning activities
